The following is an examiner's statement of reasons for allowance:

Regarding claim 1, prior art does not disclose or fairly suggest a method for quantum information processing including irradiating the at least two physical systems being coupled quantum-mechanically through a common resonator mode, in combination with all the limitations in the claim. Claims 2-13 are also allowed by virtue of their dependency.

Regarding claim 14, prior art does not disclose or fairly suggest a quantum information processor including a resonator mode that resonates with the transition common in transition frequency for the respective physical systems, in combination with all the limitations in the claim. Claims 15-19 are also allowed by virtue of their dependency.
